Wrong calculation

Steps to Reproduce:

1. Open <https://academybugs.com/store/>
2. Add any product to the shopping cart
3. Proceed to the cart or checkout page
4. Observe that the shipping cost is displayed as \$21
5. Observe that the final total becomes \$125

[Add Comment](#)

Expected Result:

The final total should equal the product price + shipping (\$21)

Actual Result:

The final price jumps to \$125 even though shipping is \$21.
The total does not match the displayed costs.
